KINCUMBER HIGH SCHOOL
NEW SOUTH WALES, AUSTRALIA

1,188 m²

THE PROJECT

Kincumber High School's two asphalt courts had become worn over time, with a bony uneven surface that impacted safety and usability for students. The school sought a solution that would improve both performance and appearance while providing long-term durability in a high-use environment.

The courts were levelled using two coats of asphalt resurfacer, followed by two coats of Rebound Ace Synpave to create a smooth, slip-resistant finish. Royal Blue and Ocean Blue were used as the primary colours, with Terracotta accents featured on select areas of the courts. The school's name was also applied between the courts as part of the refreshed, custom design.
